Hi Class,

Welcome to CM 210.

The attached sheet gives you an outline of what to expect in the course. I will give further details of the second half of the course later.

Please remember to

a) Switch off Cell phones in the class- it is very distracting to others in the room, and to me.

b) Ask questions and make comments in plenty, but make sure you are not interrupting the flow of ideas. If you have questions about stuff done in the remote past (e.g. 2 classes ago) or expected in future classes, hold on to them till the class is over and use the office hours for these. In brief, confine yourselves to whatever is being currently discussed.

c) In relation to (b) feel free to ask for time to discuss specific examples or problems. We will find a slot either immediately or at a suitable point.

d) Homework will be graded and brief solutions will be provided afterwards. Timely submission is important.

e) I would welcome emailed feedback at any time during the course. I expect you will find lots of things that need clarifications/changes and expressing these items early helps in a timely resolution.

Looking forward to a good interaction,

With best wishes

Sriram

(pronounced as Sree- Ram as in Sree- Lanka after suitable substitutions :-)
